```
$ git log --graph bloodborne-pc
```

Bloodborne reached PC one commit at a time.

Four years of human commits. Then one branch where AI wrote most of them.

$ git log --oneline shadps4

The human branch took 4 years.

Oct 2022
George Moralis starts shadPS4

Jul 2024
Bloodborne boots

Aug 2024
first time in-game

Jan 2025
"very playable" with mods

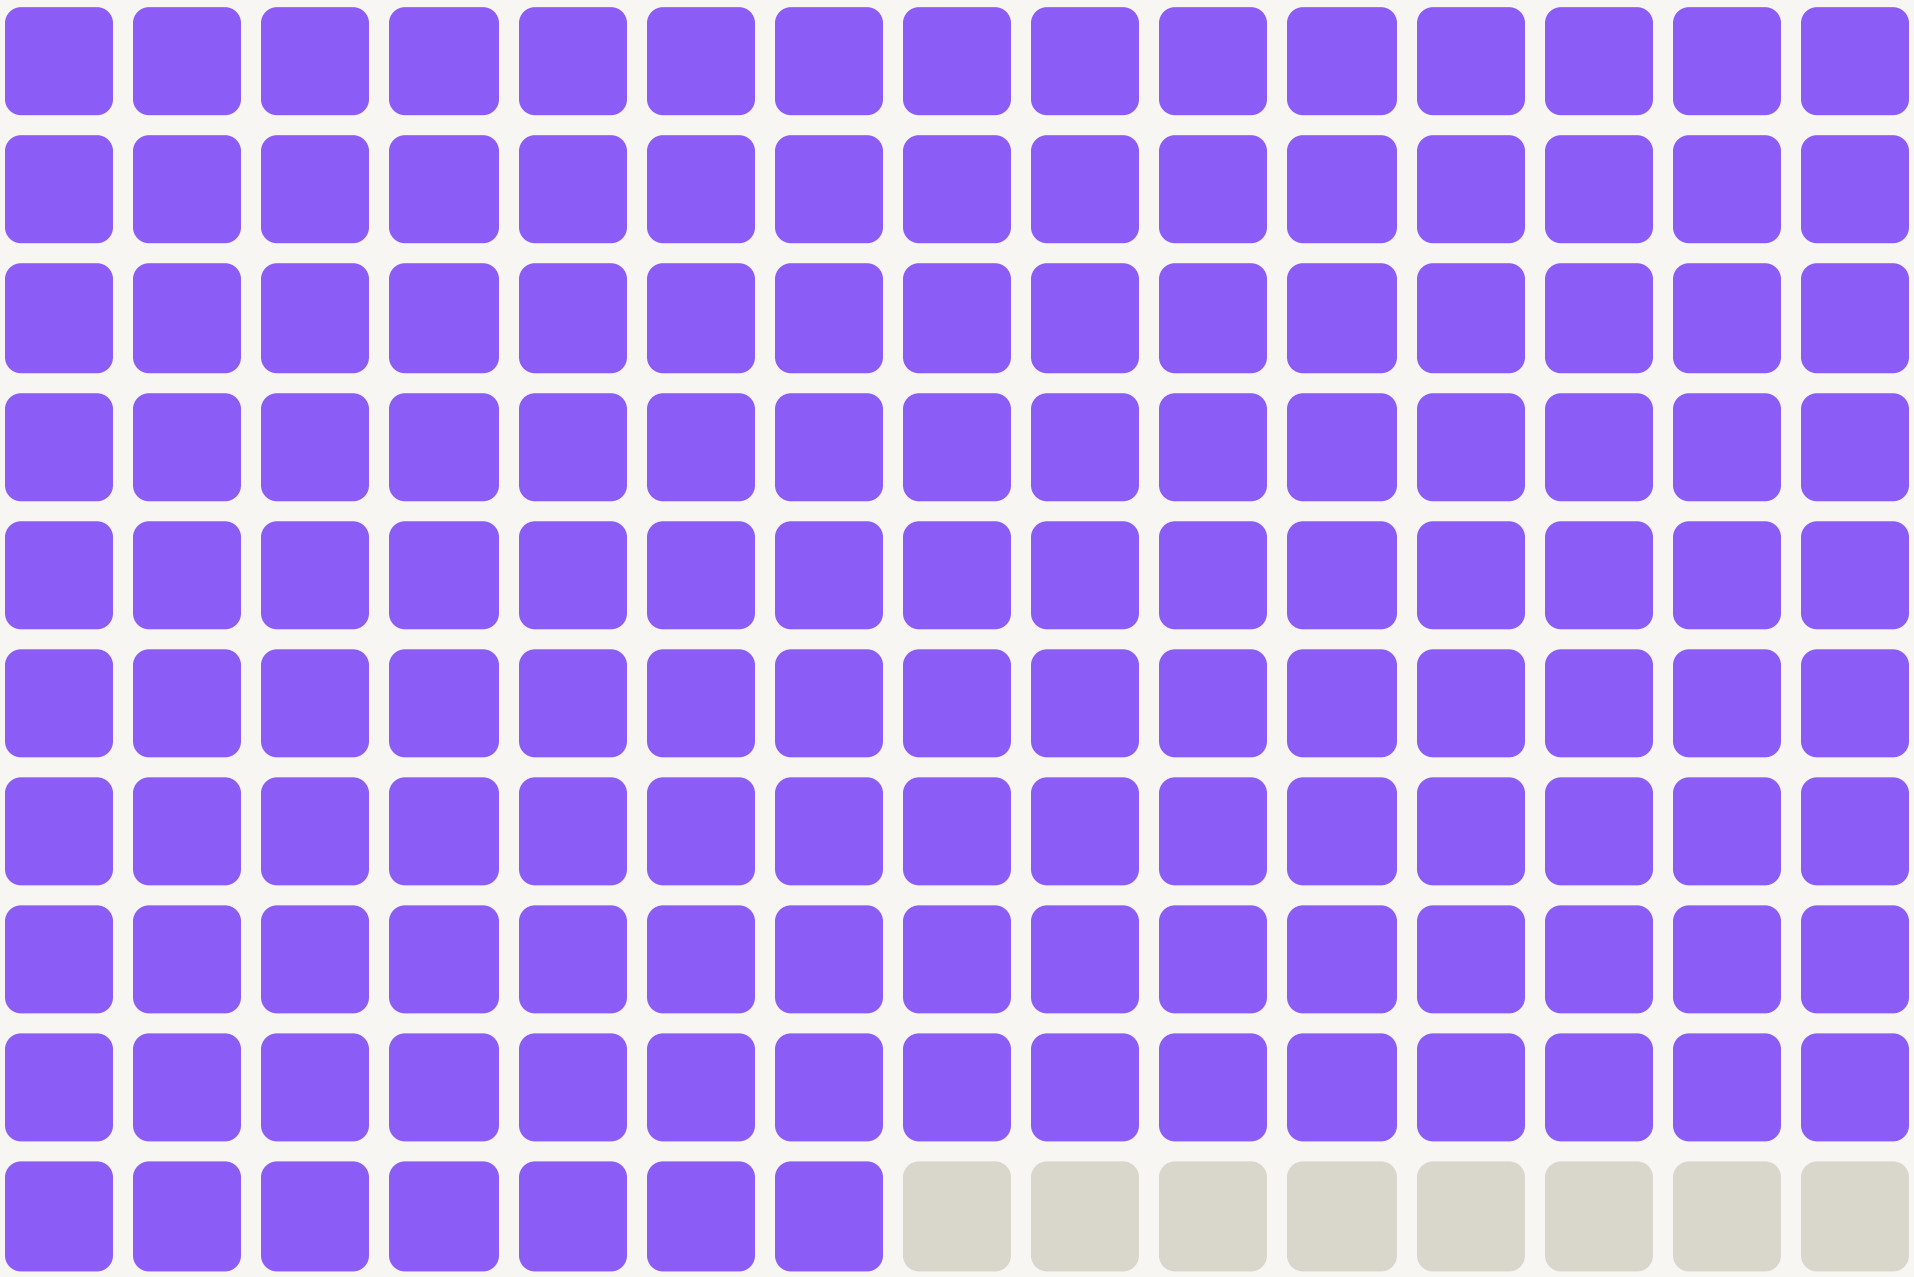

Jul 2025
fix for exploding models

Jan 2026
60 fps, tested by Digital Foundry

Oct 2026
bbport branches off the renderer

```
$ git shortlog bbport --co-authors
```

The AI branch: 142 of 150 commits co-signed by Claude.

The developer: `"I use Claude Code; it generates the code and runs checks."` A co-author tag shows AI was involved, not how much it wrote.
