2015

PS4 ONLY

locked to one console

30 fps

2026

ON PC

runs natively

60+ fps

Bloodborne was stuck on PS4 for 11 years. Then a fan vibe-coded it onto PC.

But the AI didn't do the hard part. Swipe.

nifail

EMULATOR · shadPS4

Pretend to be a PS4.

Game code
loaded by the emulator

Fake PS4 OS
rebuilt in full

Fake PS4 GPU
shaders translated

Built by humans since 2022.

NATIVE PORT · bbport

Skip the fake CPU.

Game code
runs straight on your CPU

Small runtime
~5k lines replace the PS4 OS

shadPS4's renderer
reused, then modified

Built with Claude Code, 2026.
